29th April 10,

Dear Dr Lockyer,

I am concerned that I have not heard from you following my letter of the 1st March. Since my Father is meeting with I thought that I would take the opportunity of having this letter delivered by hand to the GDC.

Enclosed is a copy of the previous letter, in it I may have sound alarmist but I do think that there is evidence that it may be true, and it should certainly be considered.

Would it also be possible to have a response within a month as this seems to have been dragging on for some time.

Best wishes,

Mike Mew
