5th February,

Dear Jane

Enclosed are more letters in this saga. I hope that you don't mind me forwarding these to you but it is important that someone else have a record of the efforts that I am going to open debate on this very fundamental issue. It is surely in the best interests of patients to have a proper open debate about these issues.

Hope all is well, I am afraid that I not really very impressed with new regulations in dentistry and worry about what is happening with NHS reorganisation, do we really need this?

Best wishes

Mike
